

Tropical Cyclone Report
Tropical Depression Nineteen
30 September - 2 October 2005
Lixion A. Avila

National Hurricane Center
1 January 2006

Tropical Depression Nineteen formed from a tropical wave southwest of the Cape Verde Islands at 1200 UTC 30 September. The depression rapidly weakened as it moved northward and encountered strong southwesterly wind shear produced by a large upper-level low. The shear removed most of the thunderstorm activity.

Date/Time (UTC)	Latitude (°N)	Longitude (°W)	Pressure (mb)	Wind Speed (kt)	Stage
30 / 1200	11.8	32.7	1009	25	tropical depression
