Joint Hurricane Testbed (JHT) 2012 Update

Transition from Research to Operations

Jiann-Gwo Jiing
JHT Director

NHC

66th Interdepartmental Hurricane Conference
Charleston, South Carolina
March 6, 2012
Joint Hurricane Testbed
Mission Statement

The mission of the Joint Hurricane Test Bed is to transfer more rapidly and smoothly new technology, research results, and observational advances of the United States Weather Research (USWRP), its sponsoring agencies, the academic community and other groups into improved tropical cyclone analysis and prediction at operational centers.
JHT Process

- Announcement of funding opportunity
- Principal Investigators apply for funding through NOAA
- 7 member Steering Committee rates all proposals
- Funded projects are tested during one or two hurricane seasons in conjunction with NHC/EMC points of contact
- Final evaluations by PIs and NHC/EMC staff
- Implementation of successful projects are then carried out by NHC/EMC/NCO staff/PIs
Summary of JHT projects 
2001-2011

1) Number of projects supported: 74
   - 62 completed
     - 35.5 accepted for operational implementation
     - Number of projects completed but rejected: 6
     - Number of projects completed but pending further investigation (decisions deferred): 9.5
     - 11 fifth round projects are being evaluated for operational acceptance
   - 12 new projects started in 2011

2) Implementation
   - Number of projects implemented: 35.5 (including 4 5th round projects)
     - Number of numerical modeling related projects implemented by EMC/NCO: 10
     - Number of projects implemented by NHC: 24.5
   - Number of projects accepted but not yet fully implemented by NHC: 4

Note:
- 1) Implementation is defined when a project is completed, accepted, and the technique installed on NCEP/NCO or NHC operational systems and runs on operational time frame.
- Some techniques were “implemented” on JHT platform for testing.
2011-2012 Major JHT Activities - 5th round

• **February – August 2011**
  - Testing of 5th round (2009-2011) projects

• **August 2011**
  - 9 Projects completed (5th Rd)
  - JHT final evaluation/report on 5th round projects (through December)
  - Decision on acceptance for implementation (NHC and EMC Directors)
    • 4 criteria for acceptance
      - Forecast or Analysis Benefit
      - Efficiency
      - Compatibility
      - Sustainability

• **March 2012**
  - Final decision made
### 5th Round Project Focus Areas

<table>
<thead>
<tr>
<th>Primary Area of Focus</th>
<th># of Projects</th>
</tr>
</thead>
<tbody>
<tr>
<td>Improvements to dynamical models (for track, intensity, and precipitation forecasts)</td>
<td>5</td>
</tr>
<tr>
<td>Statistical intensity forecast guidance</td>
<td>3</td>
</tr>
<tr>
<td>Enhancements to observed data, assimilation</td>
<td>1</td>
</tr>
<tr>
<td>Tropical cyclone structure/wind/wave distribution</td>
<td>1</td>
</tr>
<tr>
<td>Enhancements to operational environment</td>
<td>1</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>11</strong></td>
</tr>
</tbody>
</table>
Highlights of 5th Round Completed Projects

- HWRF-GFDN coupled model - Ginis
- Ocean Model Parameterizations - Shay
- Improved Wind Probabilities – DeMaria/Knaff
- Enhanced ATCF - Sampson
2011-2012 Major JHT Activities - 6th round

- **6th round funding recommendation**
  - Steering committee review proposals – Complete Feb 2011
  - Rank and select proposals for funding
  - Work with Grants Office to fund selected projects
  - Find Point of contacts among NHC forecasters and support staff
  - Work with PIs to setup timelines for their projects

- **6th round Projects (12) began Aug-Sept 2011**

<td>Improvement to the SHIPS Rapid Intensification Index</td>
<td>John Kaplan (NOAA/AOML), Charles Sampson (NRL), Chris Rozoff (U. of Wisc./CIMSS), Jim Kossin, (NOAA/NCDC), Chris Velden (U. of Wisc./CIMSS)</td>
</tr>
<tr>
<td>Introducing diagnostic variables towards extending the SHIPS algorithm for hurricane intensity forecasts</td>
<td>T.N. Krishnamurti, (Florida State Univ.)</td>
</tr>
</tbody>
</table>
Changes in Forecaster Priorities

**Second Round (2003)**
1. Intensity change, rapid intensification
2. “Guidance on guidance” for track, intensity and precipitation – probabilistic
3. Precipitation amount and distribution
4. Reduce the occurrence of guidance and official track outliers
5. Implement improved observational systems in the storm and its environment

**Sixth Round (2011)**
1. Intensity change, rapid intensification
2. Improved observational systems in the storm and its environment
3. Guidance on guidance for track, intensity and precipitation
4. Storm surge, coastal inundation modeling/applications
5. Improved and extended track guidance) and identify and removal of outliers
Funding Distribution

5th Round (2009-2011) ($1.15M)
- University
- NOAA
- Private 9%
- DOD/Navy

Includes NOAA cooperative inst.

6th Round (2011-2013) ($1.19M)
- University
- NOAA
- Private 2%
- DOD/Navy

Includes NOAA cooperative inst.
Challenges for FY12

• **Completion of 5th round projects**
  - Final reports for 5th round projects
  - POC feedback
  - JHT final review/reports to NHC Director for acceptance

• **Test and evaluation**
  - Prepare real-time testing & evaluation for 6th round projects
  - Set up necessary software code and data flow

• **Implement newly accepted projects (NHC)**

• **Work on 7th round announcement**

• **Review and recommend pre-applications**
