Funding: This NOAA Joint Hurricane Testbed project was funded by the US Weather Research Program in NOAA/OAR's Office of Weather and Air Quality

NHC Points of Contact: Eric Blake, Todd Kimberlain, Chris Landsea, & Richard Pasch

Discussion Outline

Motivation

- Enhance the Tropical Cyclone Genesis Index (TCGI), a real-time, objective, disturbance-centric scheme for identifying the probability of TC genesis in the NATL

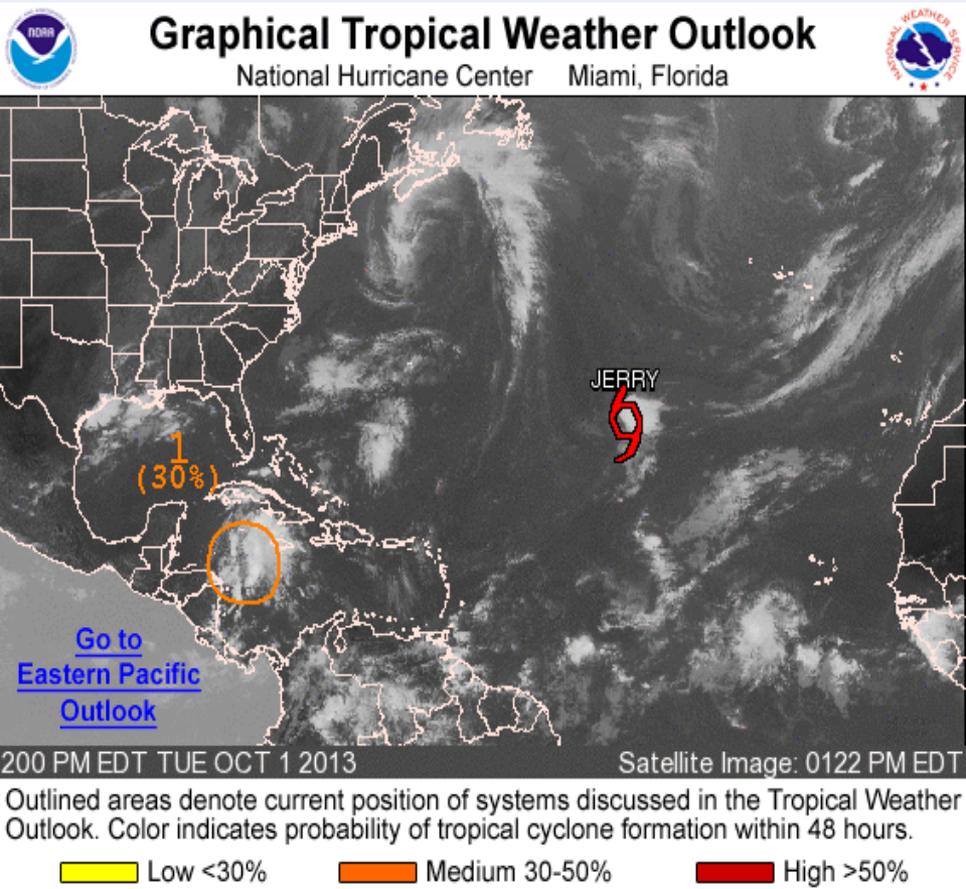

Tropical Cyclone Genesis Index (TCGI)

- Background & overview
- TCGI enhancements
- 2011-2016 verification

Conclusions & Future Work

TC Genesis Index (TCGI)

*Objective/disturbance centric/probabilistic scheme
for predicting TC genesis (0-48 hr & 0-120 hr)*

- Transitioned operations at NOAA NHC (fall 2014)
- Runs on NATL invests identified by NHC
- Requires TAFB Dvorak fixes (F-Deck)
- Run times: 00/06/12/18 UTC
t=-2 hr: :30 & :45
t=-1 hr: :00/:15/:30/:45/:55

TC Genesis Index (TCGI)

Year-2 Work Plan: **Completed** -- **In Progress** -- **Not Begun**

Fall 2016

- Develop Complete identification/development of new NATL/EPAC-CPAC TCGI predictors
 - e.g. WWLN lightning, moisture/VWS parameters, satellite TOTs

Dec 2016

- Develop code for running a real-time version of the NATL & EPAC-CPAC TCGI (GFS version)

March 2017

- Present year-2 results at IHC

TC Genesis Index (TCGI)

Year-2 Work Plan: Completed -- In Progress -- Not Begun

May-Aug 2017

- Perform real-time tests of 0-48 and 0-120 h NATL & EPAC-CPAC TCGI (GFS version) on NESDIS computers at CIRA

May-Aug 2017

- Finish development/evaluation of prototype ECMWF-based TCGI for the North Atlantic

Aug 2017

- Final code for running both the NATL & EPAC-CPAC TCGI on operational NCEP computers will be provided to NHC/NCEP IT personnel if the project is accepted for operational transition

TC Genesis Index (TCGI)

Enhancements

- 1) Expanded TCGI database to include 2001-2014
 - *currently 2001-2010*
- 2) Expanded TCGI to include EPAC-CPAC basins
 - *New NATL & EPAC-CPAC TCGI installed on WCOS (testing)*
- 3) Developing an ECMWF-based TCGI (North Atlantic)
 - *New ECMWF TCGI installed on WCOS (testing)*
- 4) Setting up a mechanism for more timely F-Deck access
 - *invest fix information direct from NOAA TAFB*
- 5) Added 850 relative vorticity (GFS)
 - *replaces GFS 850 hPa vortex tendency (DV24)*

TC Genesis Index (TCGI)

Enhancements (Cont'd)

6) Added 925-1000 relative humidity (GFS)

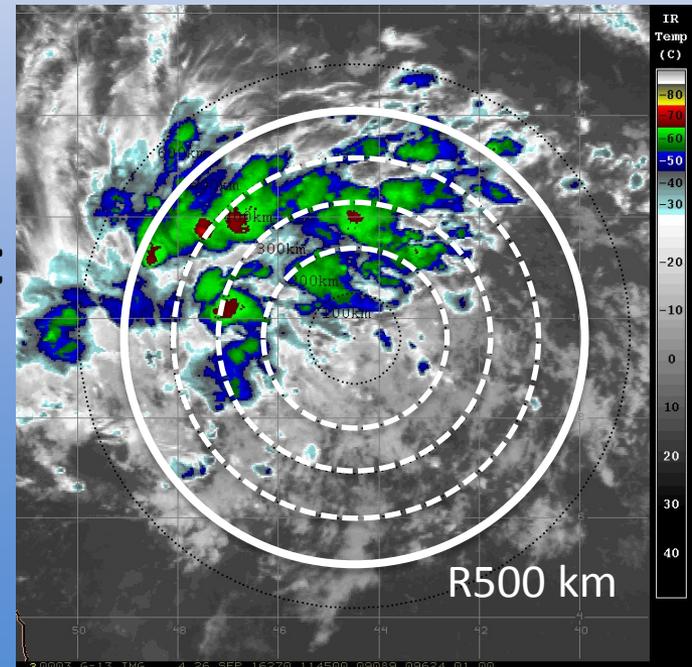

- *replaces GFS 600 hPa relative humidity (MLRH)*

7) Testing reduced 0-48 hr predictor search (R=200/300/400 km)

- *currently R=500 km for 0-48 hr and 0-120 hr*
- *Tested R200 (degraded 2013-2015 forecasts)*
- *testing R300/R400/R500 km*

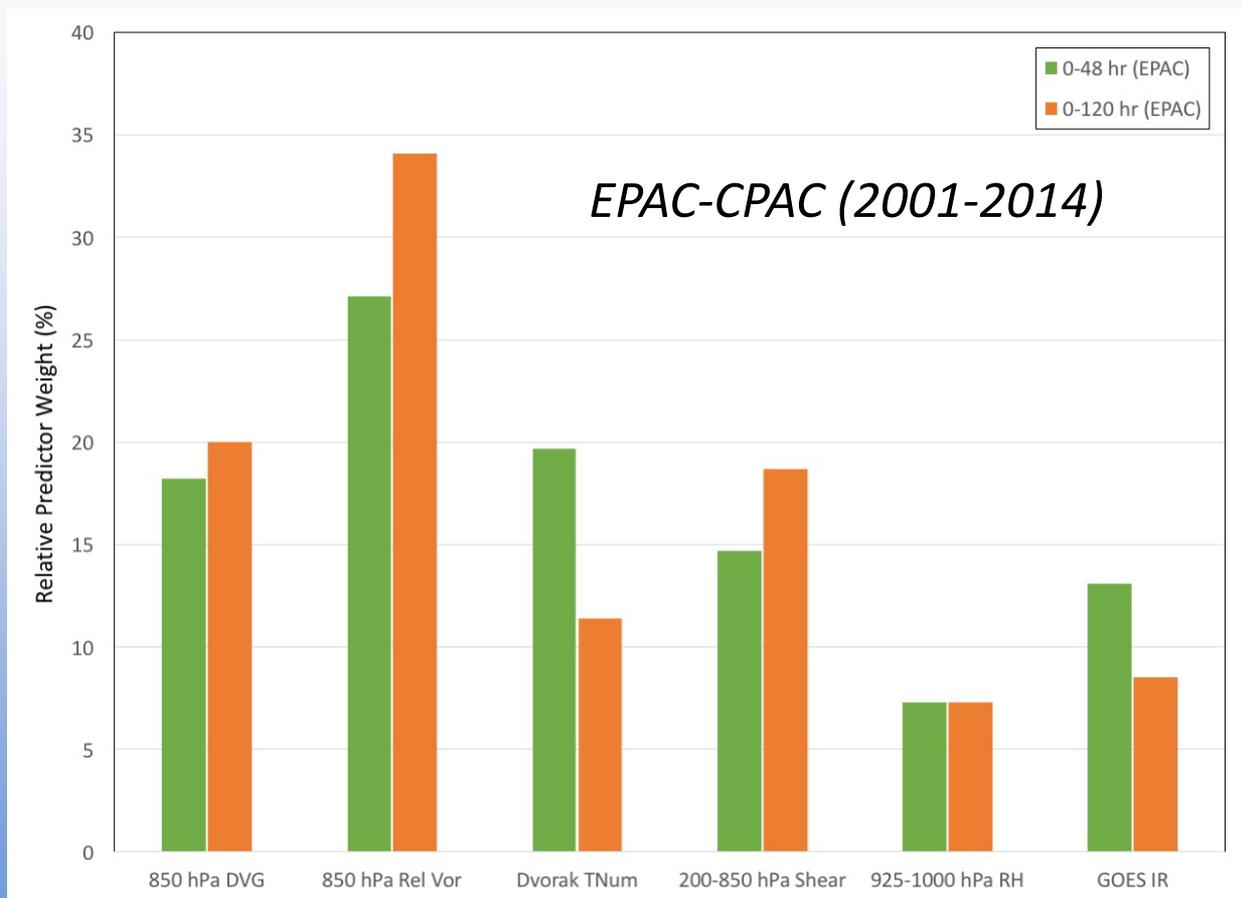

Pre-Hurricane Matthew Invest

- 26 Sep 2015 1145 UTC
- ~48 hr before genesis

TC Genesis Index (TCGI)

Relative Predictor Weights (2001-2014 Invest Database)

850 hPa **horizontal divergence** (GFS)

850 hPa **relative vorticity** (GFS)

NOAA TAFB **Dvorak T-number**

200-850 hPa **vertical wind shear** (GFS)

925-1000 hPa **RH** (GFS)

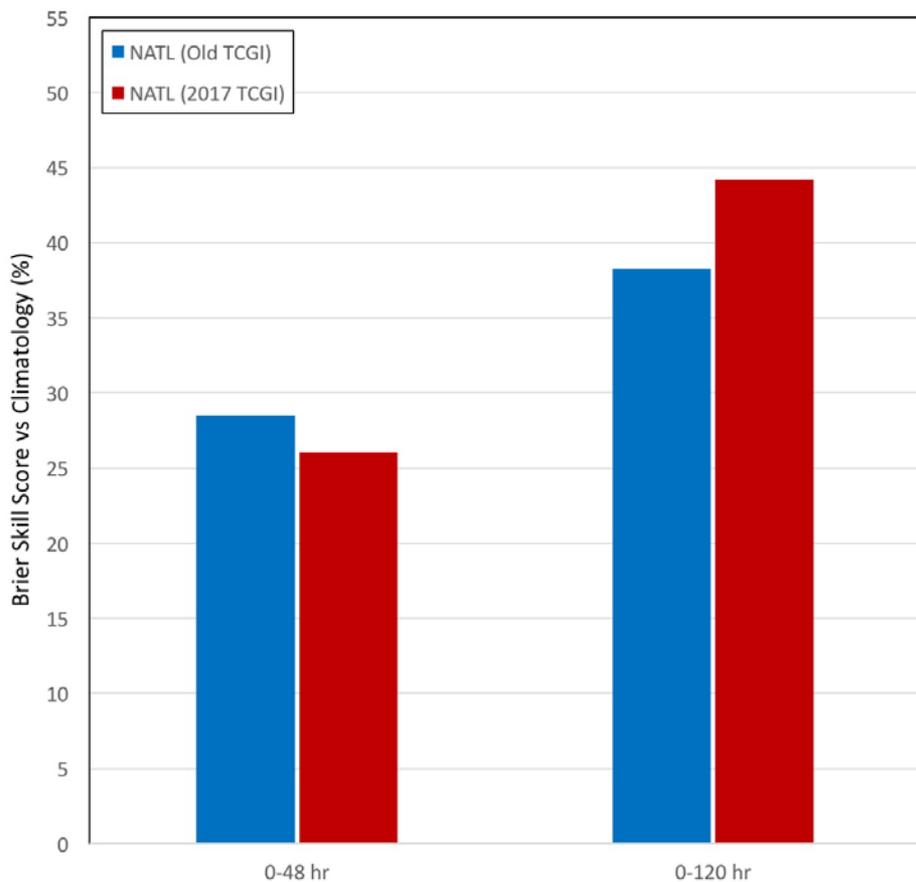

% **GOES water vapor** pixels <-40 C

TC Genesis Index (TCGI) vs NHC TWO

Brier Skill Score

0-48 hr (2011-2016); 0-120 hr (2013-2016)

Conclusions & Future Work

TCGI Year-1 & -2 Efforts (Completed)

- Expanded TCGI database (2001-2014)
- Expanded TCGI to EPAC-CPAC
- Developed new TCGI predictors (NATL/EPAC-CPAC)

TCGI Year-2 Efforts (In Progress/Planned)

- ECMWF-based TCGI (NATL) >> WCOSS testing
- Real-time GFS versions of TCGI (NATL & EPAC-CPAC) >> WCOSS testing
- Reduced 0-48 hr predictor search area (R200/300/400 km)
- Mechanism for more timely F-Deck access
- On track to deliver final TCGI code to NHC (Aug 2017)
