

Hurricanes at Home!

Webinars from the National Hurricane Center for 4th, 5th, and 6th Graders

With all of us learning and working from home, the National Hurricane Center is conducting webinars about hurricanes for 4th, 5th, and 6th graders living in the U.S. and other countries that are vulnerable to hurricanes. These webinars will focus on the job of a meteorologist, the weather hazards that come with hurricanes, and how meteorologists get you the weather information you need before a storm.

Webinars will be provided based on the schedule below, with registration links available about a week before the webinar is conducted (on the second page of this notice). We can only accommodate 500 participants for each webinar, so please only register for one of the two identical webinars provided for your region.
